

Avant-propos

La qualité de la couverture radio et donc les performances de l'interphone peuvent être altérées par des obstacles situés entre le coffret radio et le poste intérieur : murs, cloisons, dalles, portes blindées ou cage d'ascenseur comportant des éléments métalliques. (En outre, la couverture radio peut aussi être altérée par des perturbations électriques ou électromagnétiques.)

Il est important de réaliser des essais de portée radio sur le lieu de l'installation.

1 Préconisations d'installation

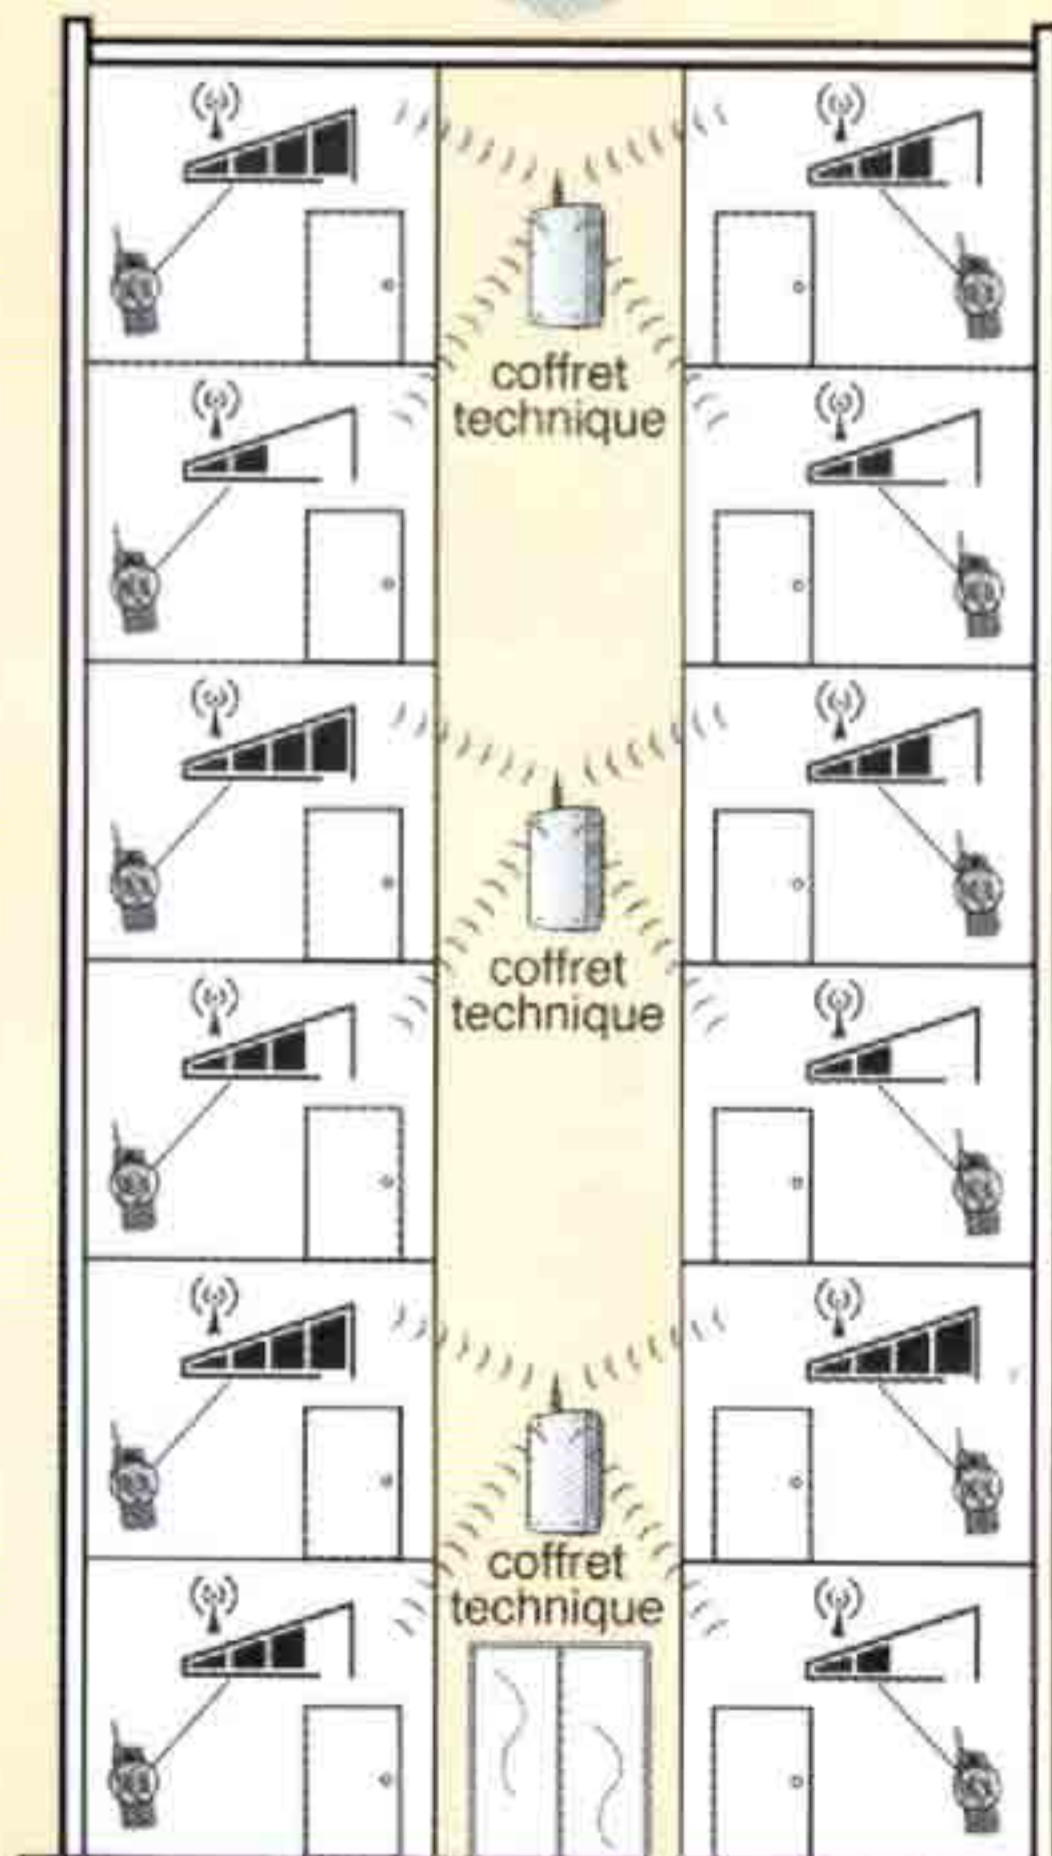

2 Déroulement des essais* à partir d'un kit interphone de maison

- 1 Alimenter le coffret technique et rechercher l'emplacement que pourrait avoir le coffret radio (placard sur le palier, colonne technique...) afin de positionner le coffret technique.
- 2 Déployer entièrement l'antenne du coffret technique.
- 3 Ne pas déployer l'antenne du poste intérieur.
- 4 Alimenter le poste intérieur.
- 5 Effectuer le test suivant à l'intérieur de chaque appartement (pour un test plus fiable) :

1 - Appuyer sur

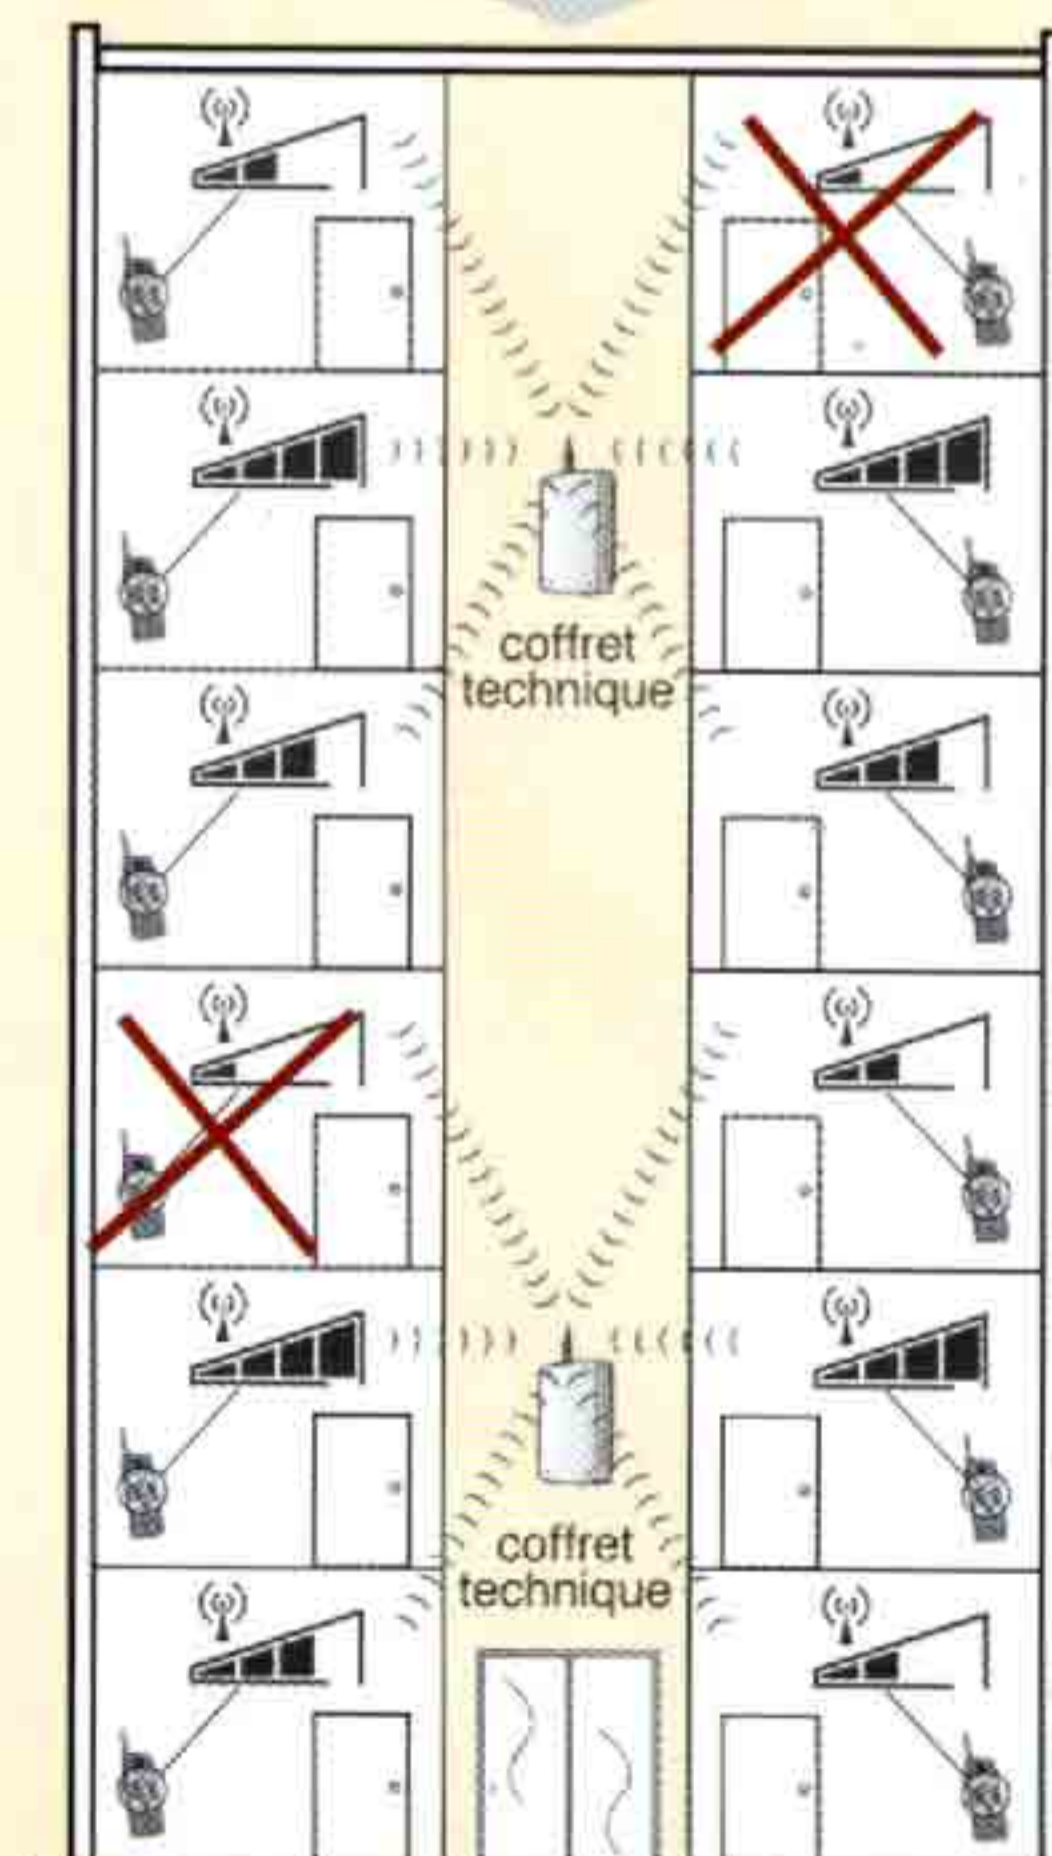

2 - Observer l'indicateur de réception radio
Si il y a au moins 2 barres, le niveau de réception est correct.

Essai concluant

Avec 3 coffrets techniques, l'indicateur de réception radio confirme un niveau de réception radio correct pour chaque appartement (donc 3 coffrets radio sont nécessaires)

Essai non concluant

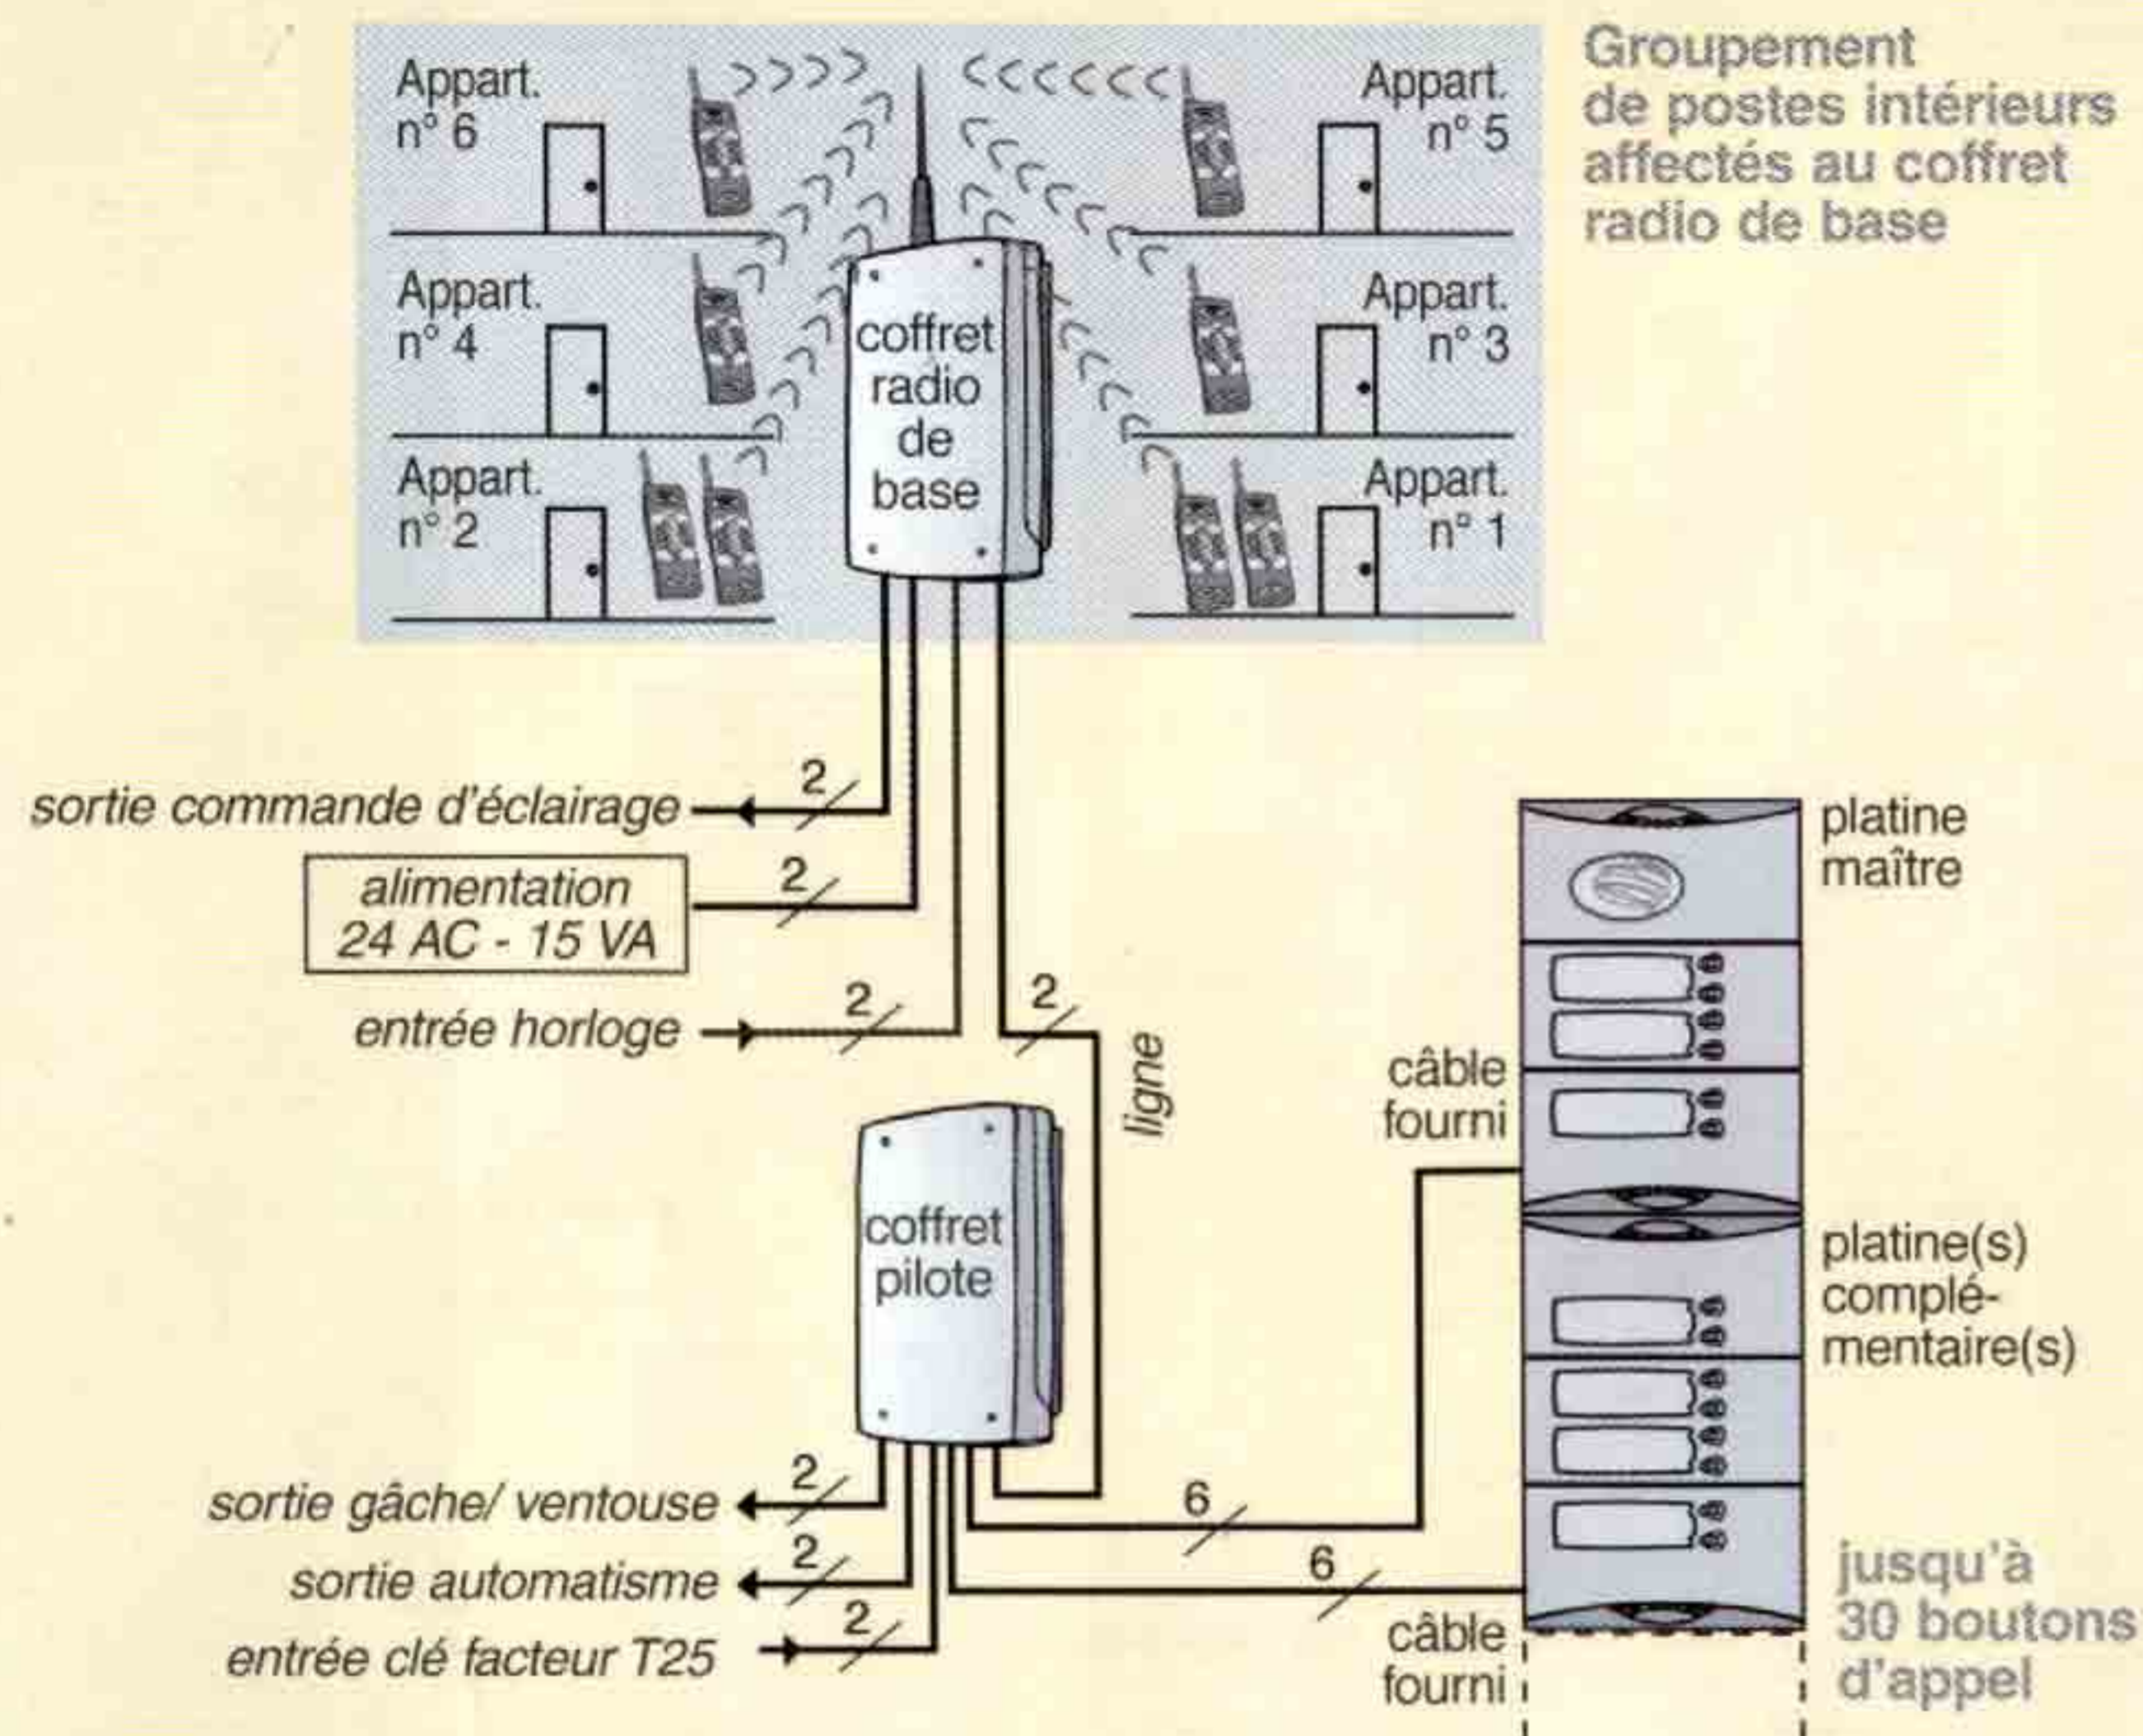

Avec 2 coffrets techniques, l'indicateur de réception radio confirme un niveau de réception radio insuffisant pour 2 des appartements (donc 2 coffrets radio sont insuffisants)

* Pour les essais, il est également possible de se procurer le "testeur de portée radio" spécialement conçu à cet effet. Dans ce cas, les essais de portée radio devront être réalisés selon les indications décrites dans sa notice.

Exemple d'une installation de base

(1 platine de rue, 1 ensemble "coffret pilote / coffret radio de base", x poste(s) intérieur(s))

⚠ Section de câbles à respecter :

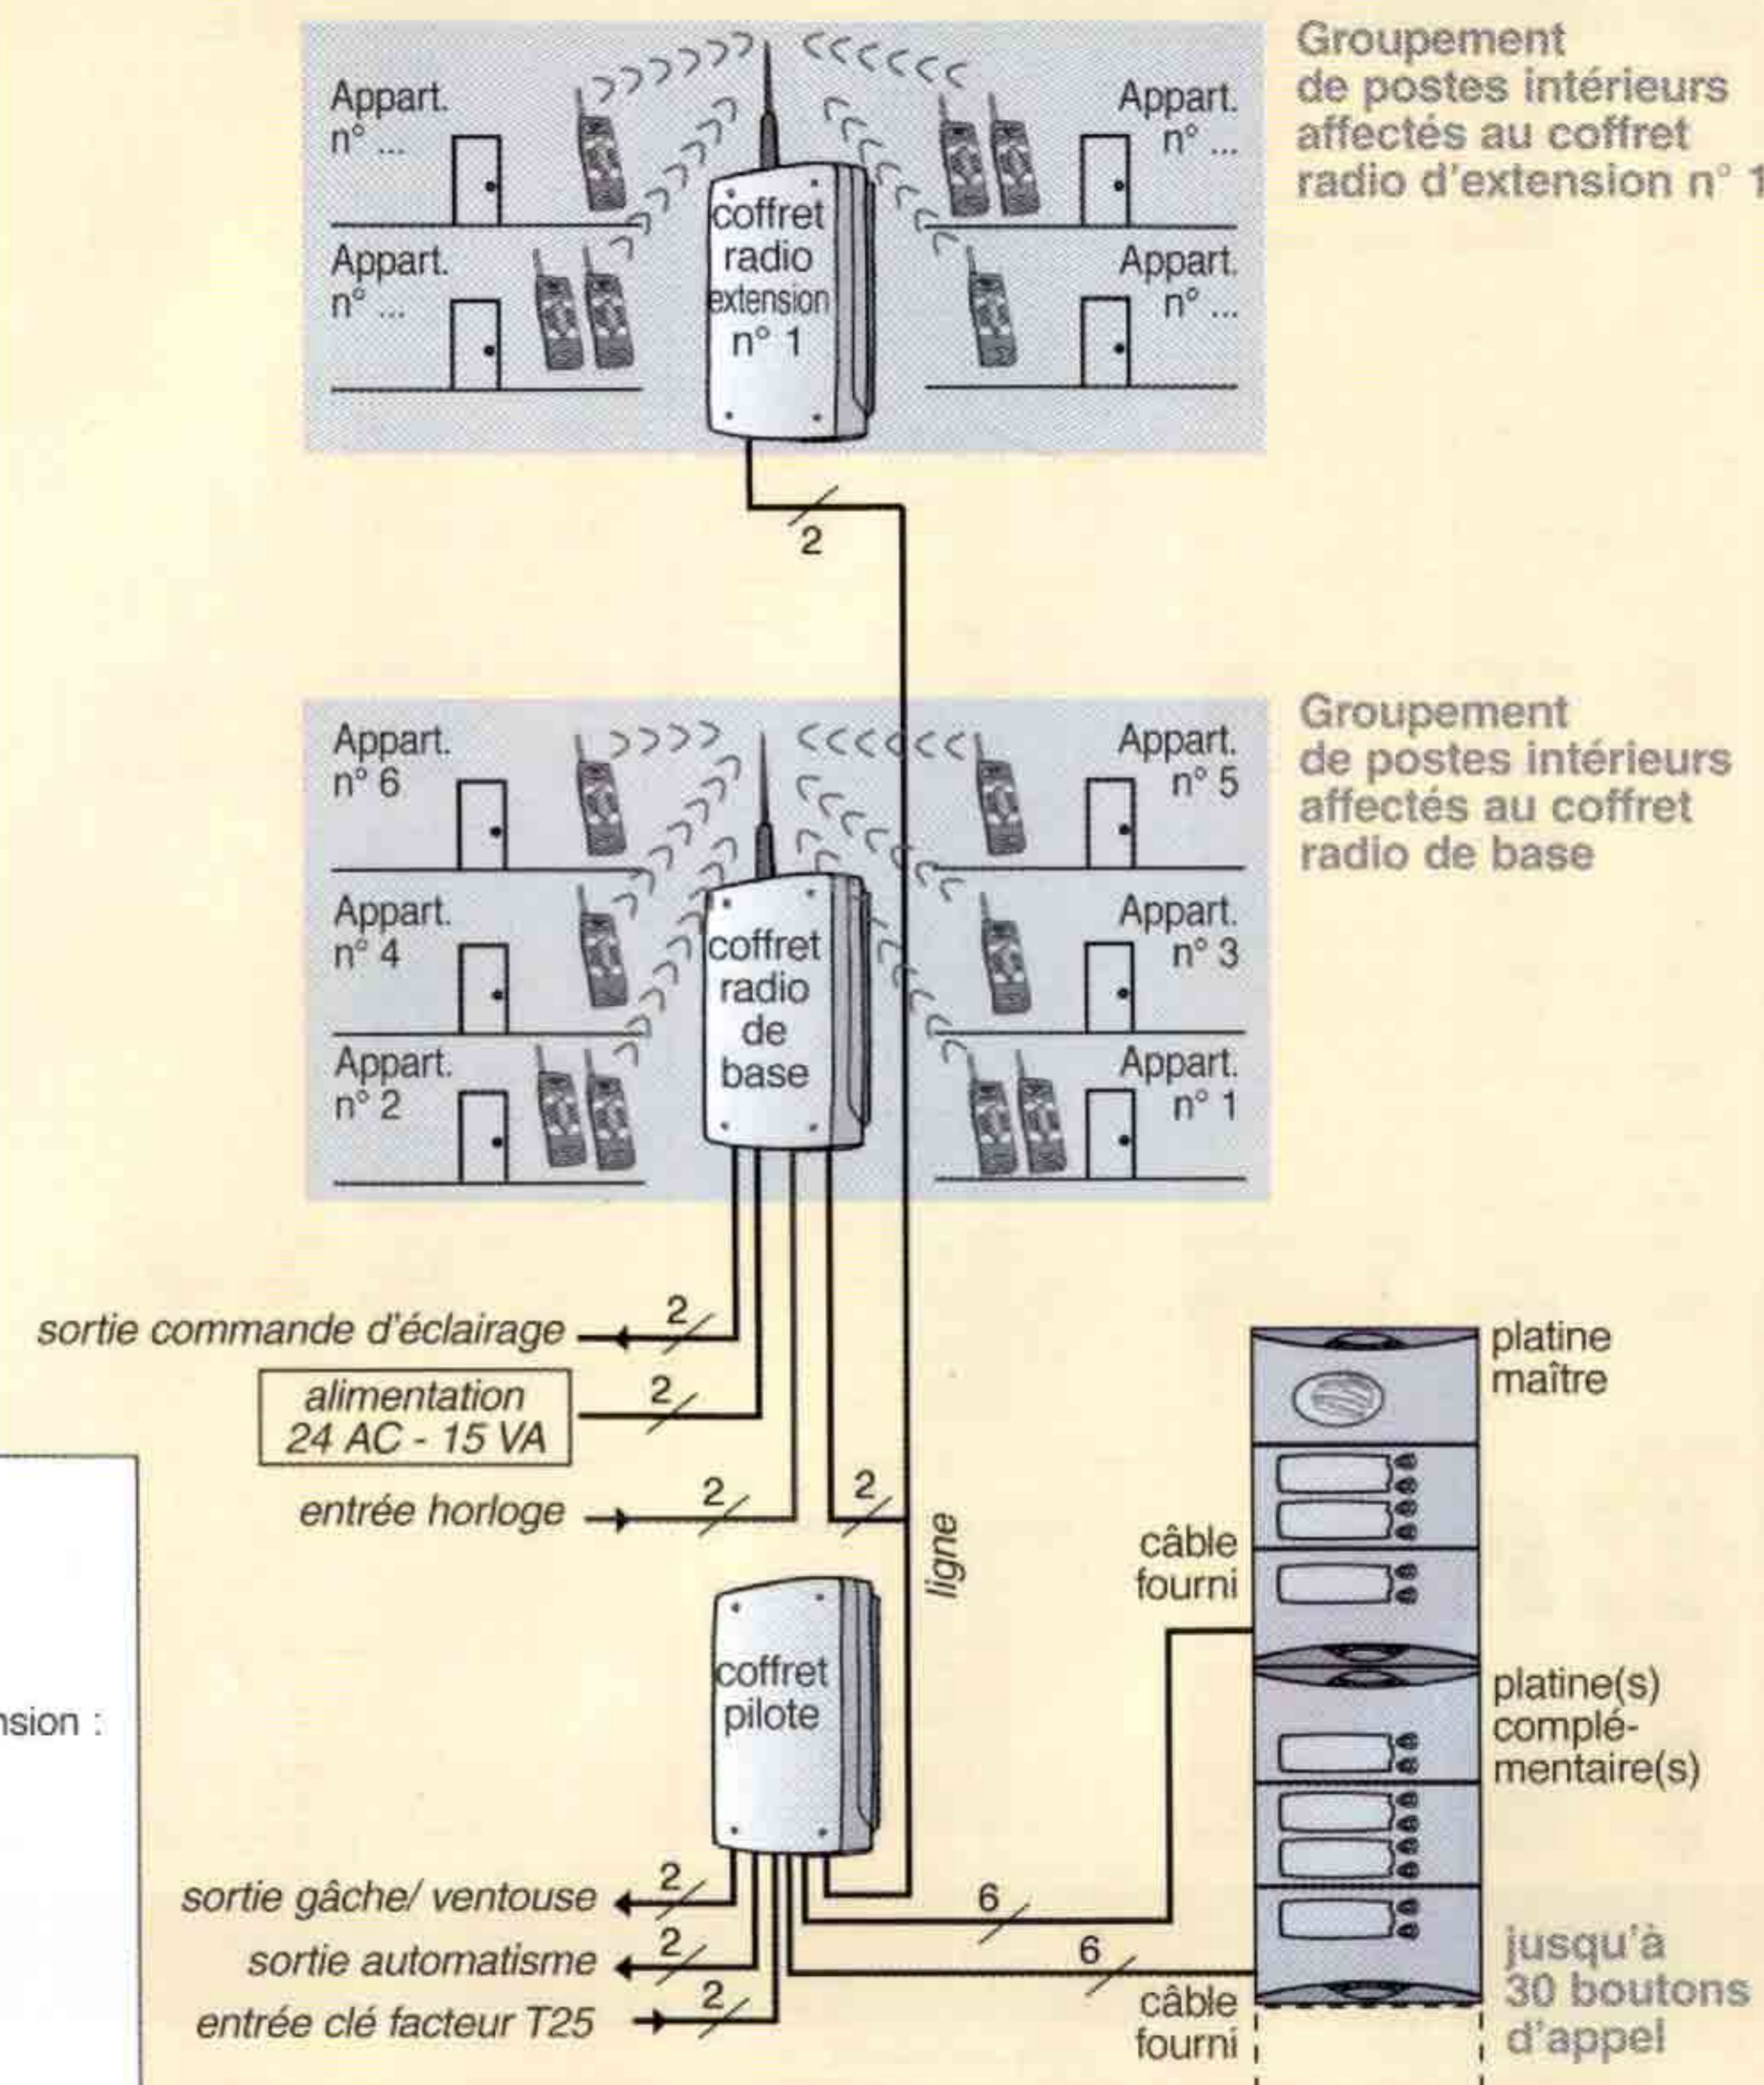

- liaison coffret pilote (câbles non fournis) → coffret radio de base :
 - Ø 6/10 jusqu'à 100 m
 - Ø 9/10 jusqu'à 200 m
- liaison coffret radio de base (câbles non fournis) → coffret radio d'extension :
- Ø 6/10 jusqu'à 200 m
- Ø 9/10 jusqu'à 300 m
- liaison coffret pilote → platine : câbles fournis

Distance entre câbles et coffrets à respecter :

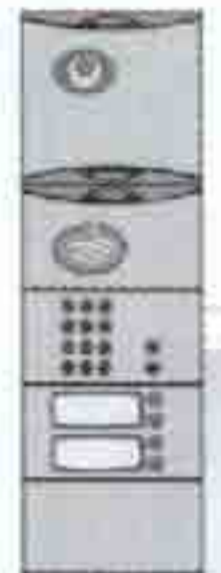

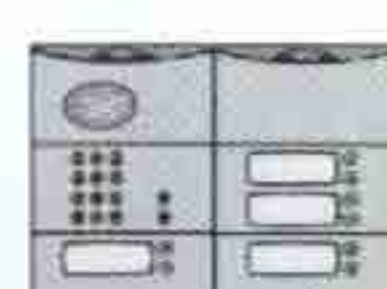

Pour ces distances, se reporter au chapitre "Précautions d'installation des coffrets" de la notice d'installation.

Exemple d'une installation de base + coffret radio d'extension

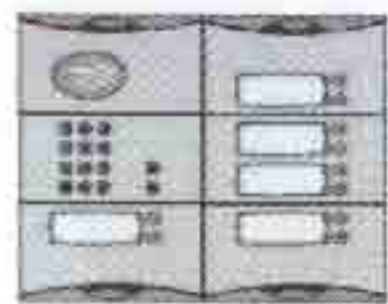

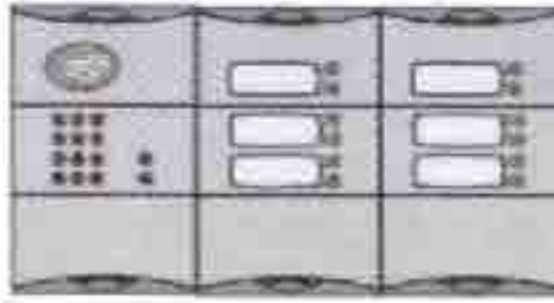

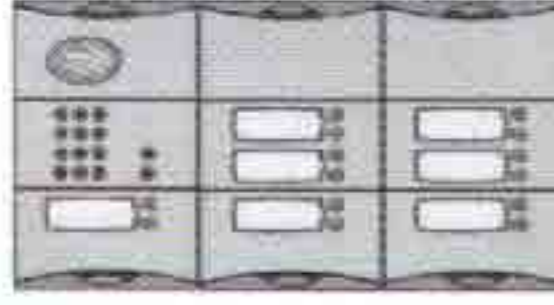

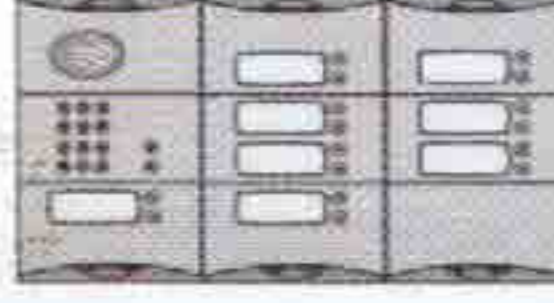

(1 platine de rue, 1 ensemble "coffret pilote / coffret radio de base", 1 coffret radio d'extension, x poste(s) intérieur(s))
